Rather an amusing accident occurred in town on last Thursday evening. Two New Baltimore boys were out riding with a girl east of town and as they were going throught town one of the hind wheels broke down. As a matter of course, they were after fixing up the rig as soon as possible, so as to be able to haul their damsel home. The boys went after another wheel and left the miss to take care of the rig. She got tired waiting on the boys and went in at a neighbor's house awaiting their return. When the New Baltimore boys came back with a new wheel thew were surprised to find out that some one had taken off the other hind wheel. They at once swore all that was good and bad and wanted to lick the whole town. As a bit of advice to the boys, the next time you get in such a fix ask kindly for your wheel and you will get it. The boys only did it for a joke expecting to return it again, but when you got up your dignity they changed their minds also. The next time you wish to take your best girl out riding be sure and get your hind wheels insured.

PRESIDENT CLEVELAND

Is Sound Health and No Cancer About

Him. WASHINGTON, Aug. 30 .- The revived report that President Cleveland was recently operated on for the removal of a cancerous growth in the mouth is discredited by Private Secretary Thurber, and two members of the cabinet, who decline to permit the use of their names. The resident is extremely adverse to lie discussion of his health and his friends are naturally governed by his well known

wishes in the matter. One of them, who is in a position to know, says the best refutation of the reports about the serious illness of the President lies in the fact that he is making preparations for a prompt return to his official duties at Washington and will probably be here before the week

closes. A member of the cabinet told a reporter that he had seen the President frequently since the date of the alleged operation and never noticed the slightest indication of such a thing, nor had he ever heard of it before today. Consequently he was confident that the report was erroneous.
